In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA?

The proposed project will provide for further development of property that is currently not fully developed resulting in an expansion of both the tax base and employment levels. It should be noted that AccuGear is owned by American Axle & Manufacturing which has over 90 global locations including over 50 in the United States and Mexico. As such, AccuGear faces competition not only from unrelated third-party manufacturers, but also must compete for capital spending allocations with its sister plants located through the U.S. These include facilities in neighboring states including Ohio, Michigan and Wisconsin that have more favorable property tax structures for manufacturers. The tax abatement benefit help makes the Fort Wayne site more competitive when comparing to other potential investment sites. Additional investment in the Fort Wayne facility will also help strengthen the long-term viability of this plant and provide skilled manufacturing jobs to help maintain a diverse local workforce.
