In order to be considered an Economic Revitalization Area (ERA), the area must be within the corporate limits of the City of Fort Wayne and must have become undesirable for, or impossible of, normal development and occupancy because of a lack of development, cessation of growth, deterioration of improvements or character of occupancy, age, obsolescence, substandard buildings, or other factors which have impaired values or prevent a normal development of property or use of property. It also includes any area where a facility or group of facilities that are technologically, economically, or energy obsolete is located and where the obsolescence may lead to a decline in employment and tax revenues.

How does the property for which you are requesting designation meet the above definition of an ERA?

Property is located within Fort Wayne, City Limits. Property has no current structure and has been vacant since zoned industrial over 15+ years ago. The location has become somewhat undesirable over the years due to the amount of investment required to prepare property for construction. Cessation of growth in the area has hindered normal development and is impairing future development. DC D proposes to develop this land and construct a 7200 sq. ft. modernistic Industrial site to house Office/Warehouse/Service Equipment and Vehicles so as to conduct and promote continued growth of Dancer Concrete Design. This facility will allow for continued expansion of DCD and require additional personnel that will be added over the next 1-5 years.
