*** Section 4.c.**

As with all software companies, clients have returned software or sought other means to dissolve a relationship with Infor. The reasons behind these events are typically attributed to client scope changes, mismanaged expectations and changed client financial constraints due to economic conditions that are outside the realm of our control. Although it is Infor's desire to be completely responsive to the City of Fort Wayne, Indiana, ensuring the confidentiality of past and existing clients is also important to us. Many of our contracts require, as an integral part of the contract, that the details of the customer/vendor relationship be kept confidential. Infor works closely with each customer to deliver a project plan within the expected targets on time and within budget constraints. We have participated in hundreds of multi-year projects, many of which remain open and on schedule.

Interoffice Memo

RE: Yearly Maintenance for Infor Asset Management Software

Members of City Council:

This ordinance is to authorize the purchase of yearly maintenance for asset management's software from Infor Public Sector, Inc. for the maintenance and repair of the City's infrastructure. This year's cost of maintenance for this software is \$130,473.43.

The software is used to track assets for:

- Water Maintenance and Service (Mains, Hydrants, Valves)
- Water Pollution Control Maintenance (Mains, Manholes, Inlets)
- Street Department (Streets, Intersections)
- Street Light Operations (Poles, Lights)

The software also manages Inventory Tracking, Preventative Maintenance Scheduling, and Requests for Repairs for the above departments and Sewer Engineering.

The cost for this software is divided between Fort Wayne Civil City (25%) and Fort Wayne City Utilities (75%). The share was determined by the approximate ratio of infrastructure assets under control of the system.

Our decision to pay maintenance rests on four tests:

- Do we have a continuing internal commitment to use this software?
- Is the software vendor continuing to improve the product?
- Is the vendor useful in solving problems with the software?
- If the software fails, what's the worst case scenario?

The Civil City and City Utilities both have substantial investments in the use of Infor Asset Management software. Infor provides regular updates to the software and supports our day to day operation of the software.

If you have any questions, please let me know.
