## Council District # 2

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: "Lakeside Sewer Separation project" as follows: The project will consist of installing approximately 10,450 LF of 12" through 36" diameter storm sewers to separate stormwater flow from the combined sewer system in the Lakeside Park area. Ponds 2 and 3 in Lakeside Park will be used as outfalls for the new storm system. A stormwater pump station will be installed to maintain ponds levels and discharge excess flow to the Maumee River.

Implications of not being approved: The Lakeside Sewer Separation project is part of the City Consent Decree, and is an integral part of compliance with the Consent Decree to reduce combined sewer overflow to the Maumee River, and to eliminate discharges at the Morton Street Pump Station during the typical year. If not constructed, combined sewer overflows will continue to occur at a higher level into the Maumee River, thus violating the Consent Decree obligation and time commitment for reduction.

If Prior Approval is being Requested, Justify: N/A
