Council District # 1

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: "Outfall 061 & 062 Relief Sewer" as follows: This project will include the construction of 7,025 linear feet of 36 to 72-inch combined relief sewer, a new outfall structure, floatables control, ditch restoration and 1,780 linear feet of 6 to 8-inch water main replacement. The relief sewer will collect combined sewage from CSO 061 and 062 to bring these overflows into compliance of 4 overflows events per typical year and will take these flows to the Water Pollution Control Plant's Wet Weather Ponds.

Implications of not being approved: This work is an integral part of compliance with the Consent Decree, to reduce combined sewer overflows to the Maumee River. If not constructed, Combined Sewer Overflows will continue at a higher level into the Maumee River, thus violating our consent decree obligation and time commitment for reduction.

If Prior Approval is being Requested, Justify: N/A
