The parties also recognize the delays, expense, and difficulties involved in proving, in a legal or arbitration proceeding, the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

However, payments to the Contractor are not to exceed 95% of the total Contract Price until the Owner has verified that the Contractor has made good faith efforts to attain the Indiana Finance Authority (IFA) State Revolving Fund (SRF) goals stipulated in Paragraph 9.03.E. Payment of the final 5% of the total Contract Price will be dependent upon acceptance of the Work, in accordance with Paragraph 15.06 of the General Conditions, and good faith efforts to comply with the IFA/SRF participation requirements; subject to reduction in the event of non-compliance as provided in Paragraph 9.03.E.

- C. Escrow Agreement.

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: Construction of a 500,000-gallon multi-leg elevated water storage tank, with connection to a 24" diameter watermain and an overflow connection to a storm sewer, including all associated pipe, valves, and other appurtenances.

Implications of not being approved: The elevated water storage tank work planned as a part of this project's construction would increase the resiliency and reliability of our potable water distribution system and reduces the potential for boil water orders.

If Prior Approval is being Requested, Justify: The contractor has asked for an expedited approval of this project for 2 reasons. The first is the volatility associated with the large quantity of steel involved in this tank construction. The second is that the contractor has identified a very tight schedule (with the lead time for steel) to be able to have the tank constructed and painted yet this year. Elevated storage tanks should not be painted during rainy or wintery weather. The increased reliability associated with the possibility of having this tank in place sooner as well as price volatility reduction is the reason why we are requesting that the rules be suspended for this contract to be approved on a tighter timeline.

This project was advertised to contractors on 11/23/2021, and 11/30/2021 in the Journal Gazette.
