Pelton Environmental Products, Inc. offers Poly Processing Company's reliable, robust tank systems for the safe storage of high performance chemicals in critical applications. Each storage system is designed specifically for the chemical it will contain. Our product offering of cross-linked polyethylene tanks offer a margin of safety that meets or exceeds ASTM standards.

Interoffice Memo

Date: April 21, 2022
To: Common Council Members
From: Michael Kiester, Manager, City Utilities Engineering
RE: WPCP Chemical Storage Tank Procurement
Work Order Numbers 77017, 76760 & 76776

Council District # 5

The contractor shall furnish all labor, insurance, equipment, materials and power for the completion of the project: Water Pollution Control Plant Chemical Storage Tank Procurement as follows: The procurement of seven bulk storage tanks.

Implications of not being approved: These storage tanks provide capacity and ensure reliability that the Water Pollution Control Plant can effectively treat water as well as maintain compliance with their NPDES permit.

If Prior Approval is being Requested, Justify: N/A

The existing storage tanks have outlived their useful life and have been scheduled to be replaced this year. There are three separate chemical processes that will be improved by this procurement. All tanks for each process had been provided by Poly Processing. To ensure that we receive a one-to-one replacement, the same manufacturer has been selected. Pelton Environmental Products is the sole supplier for these items in our area. The total purchase price is \$271,909.00.

The cost of said project funded by Utility Revenue.

Council Introduction Date: April 26, 2022
