**AMENDMENT NO. 2
TO AGREEMENT BETWEEN
CITY OF FORT WAYNE
and
American Structurepoint Inc.**

This AMENDMENT No. 2, effective May 7, 2024 is made by and between the City of Fort Wayne, Indiana (“CITY”), and American Structurepoint Inc. (“Consultant”).

Whereas, the parties entered into an agreement dated June 16th, 2020 for certain professional Engineering services related to the Leesburg Road Extension Project (“PROJECT”) bearing Work Order #0035A;

Whereas, the parties entered into Amendment No. 1 to the Agreement dated November 1st, 2022 for Subsurface Utility Engineering Services related to the PROJECT;

Whereas, CITY desires to extend the scope of the assignment, and the parties have agreed to amend the AGREEMENT as follows:

1. Scope of Professional Services:
 - a. Project Management & Coordination
 - i. Provide necessary project management and coordination regarding water utility relocation design, monument design, foundation design, Section 106 investigation, and boundary survey.
 - b. Utility Infrastructure Drafting
 - i. Plan sheet drafting necessary to incorporate City Utility’s water main relocation design into the road extension plan set.
 - ii. Quantity and cost estimation based on the provided City Utility design
 - iii. Supplemental survey
 - iv. Bidding phase services
 - v. Construction phase services
 - c. Monument Coordination & Foundation Design
 - i. Coordinate with monument designer, Studio 611.
 - ii. Incorporate monument base lighting design into plan drawings
 - iii. Incorporate central core and foundation design for monument
 - iv. Obtain geotechnical investigation for monument foundation design

- d. Section 106 Investigation
 - i. Coordinate and provide specialized studies required to complete the environmental document including evaluation of potential historic or cultural resources. This shall include a Historic Properties Report, Archaeological Records Check, and an Archaeological Short Report. Additionally, to facilitate the Corps review process, the CONSULTANT will complete the USACE Tribal Coordination Letter. It is anticipated the project will result in a finding of “No Historic Properties” and that no archaeology sites are encountered. To facilitate the Corps Section 106 process, the CONSULTANT shall attend up to one (1) virtual consulting parties meeting and up to two (2) virtual meetings with the US Army Corps. If consultation with the US Army Corps and the State Historic Preservation Officer result in the identification of a resource eligible for listing on the National Register of Historic Places which could result in a finding of “No Adverse Effect” or “Adverse Effect,” additional services will be required to complete the Section 106 process. This scope of work assumes that no (0) archaeology sites will be encountered and does not cover incidental discovery of human remains or burials. Each small archaeology site will add approximately \$3,500 to the project costs. These additional services will be considered out of scope, and additional or supplemental services will be required to complete the required consulting parties coordination and/or the preparation of a Memorandum of Agreement.
 - e. Boundary Surveying Services
 - i. Provide boundary survey for the City of Fort Wayne properties, lying between West Main Street and West Jefferson boulevard, layout tree clearing limits and boundary description for use by the City to acquire a billboard on railroad property.
- 2. Consultant’s Hourly Rate Schedule attached to this AMENDMENT No. 2 replaces in its entirety Attachment 2 of the Agreement.
 - 3. Work Allowance Increase
 - a. Additional work allowance fee is subject to City authorization and shall be utilized for additional scope and services requested by the City of Fort Wayne.

- 4. PROPOSED FEES: \$197,955
- 5. Compensation for additional services rendered under this AMENDMENT No. 2 shall not exceed \$197,955. Total fee, including services under the AGREEMENT, AMENDMENT No. 1 and this AMENDMENT No. 2, shall not exceed \$835,070.
- 6. All other provisions of the AGREEMENT shall remain in full force and effect.

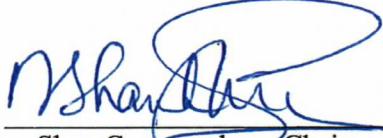

IN WITNESS THEREOF, the parties have made and executed this AMENDMENT No. 2 of AGREEMENT as of the day and year first written above.

Attachment 2 - Consultant's Standard Hourly Rates Schedule

**AMERICAN STRUCTUREPOINT, INC.
TRANSPORTATION GROUP
2024 STANDARD HOURLY RATES SCHEDULE**

Standard Hourly Rates are subject to annual review and adjustment. Hourly rates for services in effect from Jan 1, 2024, to Dec 31, 2024 are:

<u>EMPLOYEE CLASSIFICATION</u>	<u>HOURLY RATE</u>
Principal	\$425
Project Manager	\$325
Senior Engineer	\$250
Project Engineer	\$205
*Staff Engineer	\$150
Senior Planner	\$200
Project Planner	\$185
*Staff Planner	\$105
Senior Environmental Specialist	\$290
Environmental Specialist	\$180
*Staff Scientist	\$115
Senior Designer	\$285
*Designer	\$225
*Senior Technician	\$205
*Technician	\$135
*Researcher	\$160
Senior Registered Land Surveyor	\$270
Registered Land Surveyor	\$215
Staff Land Surveyor	\$145
*Senior Survey Crew Chief	\$215
*Survey Crew Chief	\$160
*Survey Crew Member (1)	\$110
*Resident Project Representative	\$205
*Construction Inspector	\$145
*Interns and Co-ops	\$85
Landscape Architect	\$165

*Rates for these classifications are subject to overtime premium of an additional 0.18 x hourly rate.

Rates shall be escalated at the rate of 5% per year and will be applicable on Jan 1st of each year.

REIMBURSABLE EXPENSES

Reimbursable expenses include direct expenses incurred by American Structurepoint, Inc., or our consultants in the performance of work which is directly related to the project. These expenses are in addition to compensation for Basic and Supplemental services. Reimbursable expenses will be invoiced at 1.1 times our direct costs. These expenses include, but are not limited to, the following:

- Renderings, models, or colored elevations
- Governmental agency review or permit fees
- Reproduction of documents for governmental agency review, bidding, or construction
- Reimbursable expenses charged to us by subconsultants
- Airline tickets, car rental, mileage, and per diem expenses for out-of-town travel
- Couriers and overnight deliveries, including FedEx, UPS, or similar carriers

The following expenses, if incurred in the process of providing professional services included in basic services, are included in the fee noted and are not considered reimbursable expenses:

- Printing for in-house purposes and progress meetings
- Plotting expenses
- Computer charges
- Postage and handling

Fort Wayne, IN 46802

Attention: Mr. Adam Urschel, P.E.

Reference: Proposal for Secondary Geotechnical Exploration
Leesburg Road and Main Street Project
Fort Wayne, Allen County, Indiana
CTL Project No. 23050005FTW-PPL

Mr. Urschel:

CTL Engineering, Inc. (CTL) is pleased to submit our fee proposal to provide additional professional geotechnical engineering services for the above referenced project.

PROJECT LOCATION AND DESCRIPTION

It is understood that subsequent to our recent geotechnical exploration, a secondary exploration is requested for the design and construction of a proposed monument to be constructed within the center of the proposed roundabout. The monument is understood to be about 45 feet tall and have a weight of about 200 tons.

SCOPE OF SERVICES

CTL's scope of services will consist of performing a geotechnical exploration for the purpose of determining the general subsurface conditions (type, consistency and depth of materials and ground water levels). The evaluation and analysis of these conditions will be used to develop cost effective design and construction recommendations specifically for the proposed monument. The geotechnical design and construction recommendations will be based on our experience with the local subsurface conditions and construction methods. Our work will be directed and supervised by licensed Indiana Professional Engineers specializing in geotechnical engineering.

As requested by the American Structurepoint, CTL proposes to perform one (1) test boring for this secondary exploration. The following table summarizes the preliminary breakdown of the number and depth of the test boring proposed for the exploration.

Table 1. Summary of Geotechnical Field Exploration

Boring Labels	Number of Test Borings	Depth of Test Borings (Feet)
Monument: B-08	1	35

The estimated total planned soil drilling and sampling footage is 35 feet. The number and/or depths of the individual test borings may be adjusted based on the details and the soil conditions encountered. The locations of the test borings will be determined in the field by CTL utilizing existing topographic features (e.g. roadways, utility poles, manholes, etc.) and/or a handheld GPS unit and internet-based satellite imagery to locate the borings. If possible, control survey points should be provided to CTL for the purpose of confirming the planned test boring locations. The final test boring locations and their corresponding ground surface elevations should be determined by surveying methods performed by others, otherwise CTL will estimate this information from topographic site plan prepared by others.

Drilling of the test borings will be performed using a truck or track-mounted drill rig having a 140-pound hammer, falling 30 inches, to drive a 2-inch O.D. split-spoon sampler for 18 inches. Drilling and soil sampling will be performed in accordance with applicable ASTM procedures.

Soil samples obtained from drilling operation will be visually classified in the field by the field personnel, then in our laboratories by laboratory personnel under the direct supervision of a geotechnical engineer. All soil samples will be tested for Natural Moisture Content. Representative soil samples will be tested for Plasticity Index, Gradation (particle size), hand penetrometer. All soil testing will be performed in accordance with ASTM procedures.

Auger cuttings and bentonite/grout will be used to backfill the drilled test borings. We are assuming that all auger cuttings can be used as backfill and will not have to be tested for contaminants of concern or will not have to be managed as potentially hazardous waste.

Soil data obtained from field and laboratory testing will be analyzed to determine the existing soil conditions and to develop subsurface models needed for earthwork and site preparation, soil modification if necessary, groundwater management and perform shallow and/or deep foundation recommendations. Also, the soil will be analyzed for approximate settlement under the proposed loading, overall stability of the proposed structure recommendations and other recommendations as stated in the specifications.

PROCEDURES

The following items will be included in the general services provided by CTL Engineering.

1. Perform visual observation and provide recommendations for apparent geotechnical related issues.
2. Layout of test borings and reference ground surface elevations at boring locations to GIS topographic databases or surveyed plans.
3. Contact the Local Utility Protection Services and owners to locate underground utilities at the test boring locations.
4. Drilling and sampling of test borings using hollow-stem augers powered by a truck or track-mounted drill rig. We are assuming the drilling crew can perform the fieldwork in Level D PPE consisting of jeans, short or long sleeve shirt, work gloves, hard hat, and steel toe work boots. A surcharge of 50% for fieldwork will be added if fieldwork requires Level C PPE.

- 5. Field and laboratory testing in accordance with ASTM procedures.
- 6. Engineering evaluation and reporting to include:
 - a. General description of site
 - b. Boring logs and soil profile to include:
 - (a) Surface elevation at each test boring location.
 - (b) Thickness of topsoil fills and subsoil strata.
 - (c) Groundwater level during drilling, at completion, and at end of day.
 - (d) Standard penetration and moisture content as a function of depth.
 - c. Existing subsurface conditions
 - d. Site preparation and earthwork requirements
 - e. Foundation support recommendations

Test boring logs, laboratory testing and recommendations will be submitted electronically in a written electronic report.

FEES FOR PROFESSIONAL SERVICES

The fees hereunder are contingent on execution of a final agreement under the mutually accepted terms and conditions of the contract between CTL and the American Structurepoint. The estimated fees for our services are provided in **Table 2**.

Table 2. Fee Breakdown

Service	Fee
Geotechnical Exploration	\$ 9,895.00

CLOSING

We sincerely appreciate the opportunity to submit this cost proposal and look forward to working with the American Structurepoint on this important project. If you have any questions or need further information, please feel free to contact us at your earliest convenience.

Respectfully Submitted,
CTL ENGINEERING, INC.

Re: Leesburg Road, Fort Wayne, Indiana

Dear Mr. Iddings:

Please see scope of work for the above referenced project, per the email that you sent on February 14, 2024. This project will need a federal permit so it will be subject to Section 106 review.

Properties will be identified and evaluated in accordance with Section 106, National Historic Preservation Act (NHPA) of 1966, as amended, and CFR Part 800 (Revised January 2001) and Final Rule on Revision of Current Regulations, dated December 12, 2000, and incorporating amendments effective August 5, 2004. Archeological investigations will be conducted in accordance and compliance with the Secretary of the Interior's "Standards and Guidelines for Archaeology and Historic Preservation" (48 FR 44716), the current version of the Indiana Department of Natural Resources, Division of Historic Preservation and Archaeology's (IDNR, DHPA) "Guidebook: Indiana Historic Sites and Structures Inventory - Archeological Sites", and recent amendments to the Indiana Historic Preservation Act (IC 14-21-1). The field work, laboratory analysis and preparation of the final report and recommendations will be accomplished or directly supervised by a qualified professional archaeologist meeting the standards set forth in 312-IAC-21 of the Indiana Administrative Code.

Deliverables:

- Historic Property Memorandum for identification and effect recommendation for the USACE for Section 106 of NHPA;
- USACE letter for Tribes;
- Archaeology Short Report.

Coordination:

- All work efforts will be coordinated through Owner's representative and the USACE.

Activity for Section 106 for USACE:

- The following tasks associated with the Aboveground Study:
 - Conduct a reconnaissance of a visual area of potential effects for the USACE permit area.
 - Consultant will prepare a Memorandum /Report of identifying and evaluating effects on historic properties.
 - W&A will attend one (1) virtual consulting party meeting.
 - W&A will participate in two (2) team meetings/conference calls.
- The following tasks associated with the Archaeology study will need to be completed:

- A records check in the State Historic Architectural and Architectural Database and research on prior reports at the Division of Historic Preservation and Archaeology for the permit area.
- Research on historic aerials, maps, and other primary source materials.
- Reconnaissance of less than 0.5 acre.
- Consultant will prepare Archaeology Short Report and submit it to USACE.

Assumptions:

- Reconnaissance for archaeology will be for the permit area;
- Only one mobilization for Section 106 archaeology;
- Within the above-ground area of potential effects for Section 106, only no resources will be affected adversely;
- One (1) meetings with consulting parties will be held regarding Section 106;
- The USACE will conduct with consulting parties;
- The USACE will prepare the Finding and Memorandum of Agreement (MOA) for Section 106;
- Short Archaeology Report will be prepared for USACE.

Information Supplied by Client

- Shapefiles of proposed preferred alternative;
- Project Description;
- Plans.

Items Specifically Not Included

- Encountering any archaeology sites or human remains.
- Any archeological studies beyond the Phase Ia (specifically Phase Ib, Phase Ic, Phase II and Phase III) are excluded.
- Full archaeology report.
- Preparation of a Memorandum of Agreement for Section 106.
- Consultation with the Advisory Council on Historic Preservation.
- Additional meetings (beyond those specifically noted in the above-listed activities).

Please note that all historians and archaeologists on staff meet or exceed the professional standards for conducting this work. Please feel free to call if you have questions. Thank you for the opportunity to submit this proposal.

Please note that W&A has scoped the archaeology for no new archaeology sites. As a result, each *small* additional site may add about \$3,000 to the project costs. Encountering medium or large archaeological sites or human remains or burials will result in costs or in schedule impacts that cannot be anticipated.

Best regards,

Ridge Wentz

Re: Leesburg - Boundary Survey

Parcel # 02-12-03-353-003.000-074
Parcel # 02-12-03-353-001.000-074
Parcel # 02-12-03-352-032.000-074
Parcel # 02-12-04-477-001.000-074

Dear Adam:

Thank you for the opportunity to provide you with a proposal for a Boundary Survey for the City of Fort Wayne properties, lying between West Main Street and West Jefferson Boulevard, Layout tree clearing limits and prepare a boundary description to acquire a billboard on the railroad property. In response to your request for proposal, we have reviewed the project and have developed the following services associated with the project:

Boundary survey fee: \$6,400.00
Layout tree clearing limits fee: \$1,560.00
Boundary description fee: \$800.00
Title and Encumbrance Report fee: \$1,150.00
Parcel plat, legal description, and computation sheet fee: \$2,800.00
R/W Staking fee: \$450.00

NIPSCO Gas – Main Street & Leesburg Trip 1 Fee = \$2,400.00

- Stake 18 proposed structure locations
- Stake Existing and/or proposed R/W at 100 ft intervals and all transition points (Approx. Length 2,100 FT)

NIPSCO Gas – Leesburg Extension at Jefferson Trip 2 Fee = \$2,400.00

- Stake 16 proposed structure locations
- Stake Existing and/or proposed R/W at 100 ft intervals and all transition points (Approx. Length 1,500 FT)

AEP – Trip 3 Fee = \$1,800.00

- Stake 12 proposed pole locations

Boundary Surveying Services

- Retrace the boundary lines of the parent property for your development. *Note: This effort will constitute a boundary retracement as defined by I.A. C. Title 865.* And create a new overall legal description for the above referenced parcel numbers.

Thank you for the opportunity to submit this proposal, and we look forward to working with you. If you have any questions, please do not hesitate to contact me at 260-755-5993

Very truly yours,

APEX Consulting & Surveying, Inc.
