PROJECT SUMMARY

- The site has been developed with commercial buildings since the late 1960's/early 1970's. The existing buildings have had a variety of uses and now appear to be vacant.

The petitioner is requesting to rezone the two properties, 6901 and 6905 South Hanna, to I2/General Industrial for light manufacturing. The overall development site has two existing buildings: one most recently used as a religious facility and the smaller of the two as warehousing.

The area around the site is a commercial-residential mix. The nearest industrially zoned area of size is located on Hanna, near Decatur Road, except for a small piece of I1/Limited Industrial at Hanna and Warfield. Not all of the uses in the Decatur Road area require industrial zoning, but because of the zoning, there are many outdoor uses that do not meet the ordinance screening or locational standards. On the commercially zoned properties in the area, there is a variety of intensity of uses. Retail is the predominate use at Southtown Centre, where outlots are still being developed. The former Kmart Plaza is being repurposed for storage. The former Target store is in use as a secure data facility. Many commercial properties have changed uses over the years, without attempts to bring the properties into compliance with the ordinance for uses, or development standards. Such is the case with 6905 South Hanna, where materials have been stored or dumped on the parking lot, with no proper screening.

Quoin Enterprises, affiliated with Fort Wayne Metals, intends to use the site and its two buildings for light manufacturing of wire for the medical industry, as well as to train new employees on the equipment.

The property in this proposal has seen many use changes, without much improvement to the property itself. The applicant intends to rehabilitate the existing buildings, repair and remove some paving, improve lighting, and generally clean up the site. Crews have already begun removing years of dumped material on the site. While there is no adjacent industrial zoning, the proposed uses would not intensify the current conditions of the property. A rehabilitated site will be a great improvement to the visual impact on the neighborhood, and occupied buildings will create a safer environment. There is no intent for outdoor storage, which will make a substantial positive impact along the US 27 corridor. The applicant also stated that there will be job opportunities for area residents.

The proposal can be supported by the following goals and policies of the Comprehensive Plan:

LU3. Use land resources efficiently by encouraging new development, revitalization and redevelopment in areas already served by infrastructure;

LU8. Use land resources efficiently by encouraging compact development alternatives in infill areas where utilities and other infrastructure currently exist.

PUBLIC HEARING SUMMARY:

Presenter: Bruce Watson, Fort Wayne Metals, presented the proposal as outlined above. Mr. Watson explained that this training facility will help with employees for Fort Wayne Metals and also with life skills for other future employees in general. They are interested in this site because it has access to Citilink and other transportation options, so they can widen their workforce options and provide more employment opportunities.
